PROFESSIONAL SUMMARY

Third-year BS Information Technology student specializing in Service Management. Full-Stack Developer and AI Systems Engineer experienced in building high-throughput web applications and automation tools. Technical expertise includes backend architectures (Laravel, FastAPI), relational database design (MySQL), and local AI processing pipelines.

TECHNICAL SKILLS

- **Languages:** PHP, Python, JavaScript (ES6+), Java, SQL, HTML5, CSS3, Bash
- **Frameworks & Backend:** Laravel (MVC, Eloquent), FastAPI, Django, Node.js, RESTful APIs
- **AI & Media:** Faster-Whisper, OpenCV, FFmpeg, PyTorch, Groq LPU, OpenAI API
- **Frontend:** Tailwind CSS, Vanilla JS, GSAP, Lenis Scroll, WebGL, Bootstrap
- **Databases:** MySQL, PostgreSQL, SQLite, Relational Modeling, Index Optimization
- **Tools:** Git, Docker, Nginx, Postman, GitHub Actions, Antigravity, Codex

RELEVANT PROJECTS

RoninClips – Local AI Video Processing Engine | Lead Architect 2026

Laravel, Python, Faster-Whisper, OpenCV, Groq AI, FFmpeg, MySQL

- Architected an offline media automation platform bridging **Laravel** with asynchronous **Python** micro-engines.
- Integrated **Faster-Whisper** models for timestamped transcription and animated subtitle rendering.
- Developed **OpenCV** facial tracking to convert 16:9 landscape footage into speaker-centered 9:16 vertical reels.
- Constructed **FFmpeg** pipelines for video slicing, emoji insertion, and audio ducking under low-latency constraints.

PawfectMatch – Pet Adoption Platform | Full-Stack Developer 2026

Laravel, PHP, MySQL, JavaScript, Tailwind CSS

- Engineered a production-grade management system with public discovery gallery and administrative control center.
- Developed an interactive natural language **chatbot for FAQ** processing and pet profile recommendations.
- Implemented role-based authentication and administrative application triage workflows using **AJAX**.
- Structured normalized **MySQL** schemas ensuring sub-100ms response times for complex filtering queries.

AI Task Automator & Ticket Suite | AI & Backend Engineer 2025

Python, FastAPI, OpenAI API, Groq LPU, MySQL

- Developed a **LLM-based ticket** classification engine to automate categorization and response generation.
- Reduced manual triage volume by 70% through background job queues and automated webhooks.
- Built **REST API** endpoints in **FastAPI** with Pydantic validation and database transaction handling.

EDUCATION

University of Mindanao | Davao City, Philippines Expected Graduation: 2028
Bachelor of Science in Information Technology, Major in Service Management

CERTIFICATIONS

Google: Introduction to AI (July 2026) | Technical Support Fundamentals (April 2026)

Certiport: IT Specialist – HTML and CSS (June 2026) | IT Specialist – Databases (May 2026) | IT Specialist – Java (March 2025)

Sololearn: Python Developer (November 2025)
